

## DESCRIPTION

EP210 is a completely independent robot cell that with high precision and pace picks products from a conveyor and places them in customer specific packaging. The cell is a standard equipment but has excellent opportunities for customer adaptation to specific products and demanding needs.

## PRODUCT SPECIFICATION

|              |                |
|--------------|----------------|
| Capacity     | < 70 picks/min |
| Availability | 96%            |
| Material     | Lacquered      |
| Robot        | ABB IRB360     |

## OPTIONS

|                     |               |
|---------------------|---------------|
| PLC                 | Siemens       |
| Food classification | Selected zone |
| Product number      | Selectable    |
| Service agreement   | Annually      |
| Distance support    | EvoConnected  |
| Training            | EvoTraining   |
| Commissioning       | Custom        |

## TECHNICAL SPECIFICATION

|         |           |
|---------|-----------|
| Current | 25 A      |
| Air     | 500 L/min |
| Width   | 2000 mm   |
| Length  | 4600 mm   |
| Height  | 2200 mm   |
